

kcca_replication.R

patrickhunnicutt

2020-06-08

```
#TO DO:
# all data files should source from single replication folder set by here(), rather than team-specific
# metadata with datafiles should be separate documents
# replication directory should have a ReadMe.txt file that describes each individual file and variables
# replication directory should have copies of all data collection instruments

#####
#####
#Replication code for:

#Mark T. Buntaine, Patrick Hunnicutt, and Polycarp Komakech
#The Challenges of Using Citizen Reporting to Improve Public Services: A Field Experiment on Solid Waste
#Journal of Public Administration Research & Theory

#Prepared by: Patrick Hunnicutt
#Patrick Hunnicutt contact (as of May 2020): hunnicutt@bren.ucsb.edu

#Compiled using R Version 3.6.1 (2019-07-05) (version "Action of the Toes") on x86_64-apple-darwin15.6.
